Regulatory Tracking Summary

02 November 2012

This report summarizes regulatory items reviewed by the NASA RRAC PC and includes items with direct applicability to NASA facilities and operations, as well as items of general interest. Notes and comments by the RRAC PC are shown in bold, blue text under "Description." Related documents and citations, such as "77 FR 51967," are linked to the appropriate document for quick access. Suggested follow-up actions are noted with significant items; users are advised that other follow-up actions may be appropriate for their program or facility. Previous issues of this regulatory summary and other materials are archived on the RRAC PC website at <http://www.nasa.gov/offices/rrac/home/>.

Comments, questions, suggestions, and requests for further information should be directed to the RRAC PC Manager, Sharon Scroggins at 256-544-7932 (sharon.scroggins@nasa.gov).

1.2 Other News and Developments

1.2.1 "How's My Waterway" Application and Website

EPA has [released](#) a new "[How's My Waterway](#)" application and website that allow users to map the health of lakes, rivers, and streams across the United States. The waterway data are based on biannual reporting that states submit to EPA. Users can view a list of waterways, the date of the most recent waterway assessment, and waterway status. Selecting an individual waterway could result in a list of technical reports on the following subjects:

- Reported condition (such as assessed/ not assessed and polluted/ not polluted)
- Pollutant categories (such as bacteria, microbes, low oxygen, etc.)
- Actions taken to improve conditions (such as Cleanup Plans, Runoff Control Projects, etc.)

[Additional information](#) available to users includes the following:

- Descriptions of the [types of water pollutants](#)
- Potential pollutant sources
- Potential health effects resulting from pollutant exposure
- Geospatial [data](#)

1.2.2 Antarctic Ozone Hole Monitoring

NASA and the National Oceanic and Atmospheric Administration (NOAA) [reported](#) that 2012 monitoring efforts have shown the 2012 Antarctic ozone hole to be the second smallest in 20 years. The maximum size reached in 2012 was approximately 8.2 million square miles. This is in comparison to the largest recorded hole, observed on 06 September 2000, at 11.5 million square miles. Researchers also noted that the minimum concentrations of total ozone in the ozone hole were measured at the highest levels recorded in 20 years. More information about the Antarctic ozone hole is available on NASA's Ozone Hole Watch [website](#).

1.3 NASA Regulatory Communication Working Group Updates

The next Regulatory Communication Working Group call will be held on Wednesday, 05 December 2012 at 10 a.m. CT.

2.0 State Regulatory Reviews

The following sections provide details about the regulatory actions reviewed for selected states in which NASA facilities and related operations are located.

2.1 Alabama State Regulatory Review

This summary includes items that were reviewed for potential impacts to NASA Centers and related operations in Alabama.
